FEATURES & BENEFITS

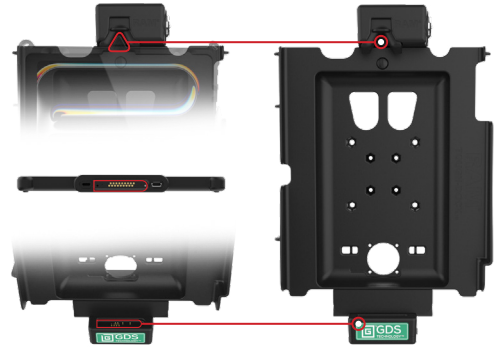

Fast and convenient charging

With the GDS/IntelliSkin system, devices charge up to 30% faster when paired with compatible docks and chargers. Pogo contacts make docking simple, without fumbling with cables: just dock the IntelliSkin-wrapped device to charge.

Reliable connection, rugged protection

Soft, shock-absorbing material protects the device. The internal USB-C connector protects the device port and converts the connection to flat, easy-to-clean pogo contacts. An additional USB-C port provides access to the device when not using a GDS Dock.

Easy docking with positioning markers

Built-in IntelliSkin positioning markers match the markers on the GDS Tough-Dock. They help align the device correctly for quick, easy docking throughout the working day.

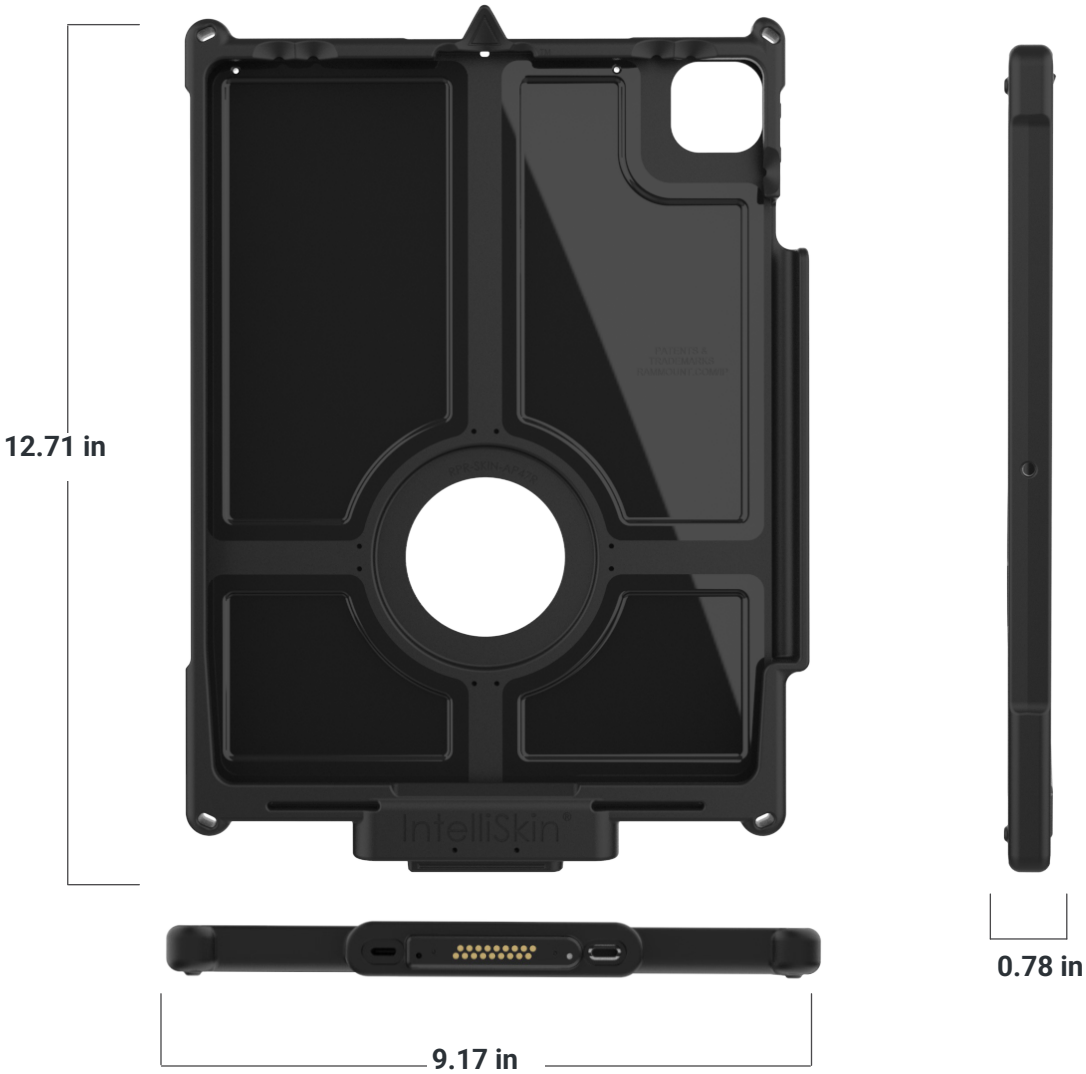

Easy to clean

Dirt and debris can interrupt the connection to the device. The flat pogo contacts on the bottom of the IntelliSkin reduce debris buildup and are easy to clean.

IntelliSkin and GDS Vehicle Docks for Apple iPad Pro 13 (M4) & iPad Air 13 (M2)

DIMENSIONS

IntelliSkin and GDS Vehicle Docks for Apple iPad Pro 13 (M4) & iPad Air 13 (M2)

COMPATIBLE GDS TOUGH-DOCKS

RAM-GDS-DOCKB-AP37U
